

Versatile Enterprise is a multi-tiered client/server application. Following are the system specifications and requirements for running Versatile Enterprise.

□ **Client Workstation**

Computer with Intel® Pentium® III or above
(Pentium 4 required for Windows® Vista®)
256 megabytes RAM—1 gigabyte is recommended
USB port required for portable barcoding unit

□ **Workstation Operating System**

Windows XP®, Windows Vista, or Windows 7

□ **Network**

Supported on Windows and Novell® network platforms

□ **Application Server**

Pentium III CPU or higher
Microsoft Windows 2000 Server®, Windows 2003 Server, or Novell NetWare® 6x
200 megabytes disk space
512 megabytes to 1 gigabyte RAM
May be shared with other applications, or may reside on a dedicated server

Note: The application server must be available to run up to two services. Your configuration of Versatile Enterprise will determine which of these services will be installed.

Note: For both Oracle® and MS SQL®, the appropriate database client may need to be installed on the application server and/or the services server.

□ **Database**

Requires Microsoft SQL Server™ version 2000/2005 or Oracle 9i/10g. These database platforms support virtually unlimited amounts of data. Please refer to the database platform for specific hardware requirements.

The full-text searching catalog for either database platform must be enabled.

□ **Printers**

Any printer that can be installed on the Windows platform
Laser or thermal transfer barcode label printer recommended for barcode printing

□ **Installation**

Minimal disk space required for client install, but at least 400mb of disk space required for temporary cache files used by the application

200 megabytes disk space on application server

300 megabytes to 2 gigabytes disk space on database server

□ **Barcode Technology**

Fully integrated Code 39 barcode technology. Barcode labels can be generated for boxes, files, documents, users, and shelf locations from within the system.

Supports tethered and portable barcoding
